

EXPERIENCE CERTIFICATE

**INGENIEUR:INNEN
OHNE GRENZEN**
AUSTRIA

Date: 04.12.2025
Ref. No.: IOGA-NPL-01 / 2025

To Whom It May Concern,

This is to certify that Mr. Dharambir Yadav (Date of Birth: 12 June 2002), a Civil Engineering graduate from Kathmandu, participated in a technical field visit and site inspection of the *Raghuchour Drinking Water & Irrigation Project (IOG Austria)* in Nepal.

Mr. Yadav joined the project team in Raghuchour for three days in February 2025, during which he actively engaged in on-site technical observation and contributed to several engineering discussions relevant to the ongoing construction and rehabilitation works.

During his stay, he:

- Visited and inspected various components of the water supply and irrigation system, including intake structures, distribution lines, storage tanks, and erosion-affected sections.
- Observed the implementation of critical construction tasks such as the cable-supported river crossing (140 m span), washout chamber construction, pipe welding works, and slope-stabilisation measures.
- Reviewed the project's technical approach to working in geologically unstable terrain and provided constructive insights based on his academic background.
- Interacted with engineers from IOG Austria, technicians from PPUK, and local community members to better understand the operational challenges of water supply in rural hill regions.
- Gained practical exposure to field decision-making, community coordination, and maintenance considerations for a gravity-fed irrigation system in a remote village setting.

His participation was marked by professional curiosity, respectful communication, and a positive learning attitude. His contribution to technical discussions and willingness to support the team on-site were appreciated.

This certificate is issued upon his request as a recognition of his involvement and to support his professional development in the engineering field.

We wish Mr. Yadav every success in his future academic and professional career.

Sincerely,

Dipl.-Ing. Florian Silbernagl (M.Sc)
Project Engineer – Raghuchour Drinking Water & Irrigation Project
Ingenieur:innen ohne Grenzen Austria (Engineers Without Borders Austria)
